

Working Student – Digital technologies and sustainability in the context of industrial services (m/w/d)

Start by February 2025 or later

University of St.Gallen

Institute of Technology Management

Who we are & what we do:

Are you passionate about the digital service transformation of industrial companies? Do you want to actively shape the development of sustainable solutions and services in the industrial sphere? Join our research team to work on cutting-edge projects.

We are the "Smart Manufacturing & Services" research team led by Prof. Friedli at the Institute of Technology Management (ITEM-HSG). We collaborate with global B2B companies to craft strategies that transform them from mere product to solution providers as well as champions of circular business models.

What you will do:

- Contribute to project management activities involving renowned industrial and software companies.
- Collaborate closely with our team to pioneer and implement innovative approaches for the creation and promotion of digital business models.
- Provide support in the execution of studies and industry reports spanning diverse sectors.
- Engage in efficient collaboration and communication within multifaceted teams, including senior leaders, while upholding a structured approach.
- Develop your working style and expertise by actively participating in projects, leveraging personal interests, strengths, and experiences.

What you bring:

- Pursuing a university degree in business administration or a related field, with a strong interest in industrial companies
- Results-driven approach, initiative, creativity, and team spirit.
- Proven ability to handle pressure.
- Interest in digital services and business models, possibly related to industrial sustainability.
- Strong interpersonal skills for interactions with project members.
- Prior experience preferred, e.g., consulting or industry internships.
- Proficiency in both English and German, alongside competence with standard MS Office programs.

What we offer:

- Inspirational work environment at a leading European business school with highly qualified and ambitious experts.
- A great team of young colleagues and like-minded individuals who find joy in tackling new tasks and challenges every day.
- Network: Benefit from cross-functional events, support in workshops and develop your network.
- Fit & Healthy: fruit and coffee at the workplace, sport events with colleagues.
